# GAME OF LIGHTS

## CONTROL YOUR LIGHTS VIA SMARTPHONE

This wireless kit allows you to control not just the bulbs, but also other wireless units from your smartphone using iNELS Home Control.
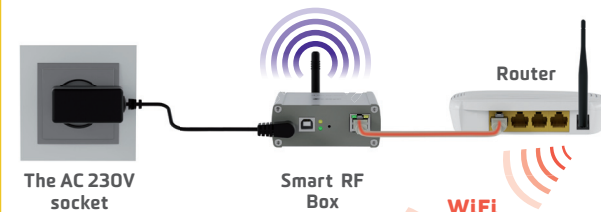

## KIT CONTAINS

Code: **4931**

### WIRELESS COLOURED BULBS
3× RF-RGB-LED-550

These LED bulbs contains three color chip (RGB), which can mix up any color (including white) at different temperatures.

- bulb has a built-in receiver and dimmer, so it can be easily replaced for the original bulb
- **function:** colorful scenes, brightness setting, color blending
- **parameters:** RGB chips, power supply 230V AC, power 9 W, luminous flux of 550 lm, E27 socket, dimension 65 x 115 mm

Code: **4684**

### SMART RF BOX
1× e-LAN-RF-003

The Smart RF box is the mediator between your controller (phone, tablet, Samsung Smart TV) and wireless units controlling lights, heating, blinds, sockets and other appliances.

- appliances can be controlled from your home WiFi network
- when you are not at home, they can be controlled through data by your network provider
- If you dont have your own WiFi network, then you can use other type of Smart box with built-in WiFi (ELAN-RF-wireless-003)
- **parameters:** LAN RJ45, power supply 10 to 27 V DC (adapter included in the package), size 90 × 52 × 65 mm

## HOW DOES IT WORK?

It´s possible **to connect up to 40 additional** colored light bulbs or other wireless devices.

**RF signal - range up to 200 meters**
(range of wireless devices depends on the building construction)

**Router**

**The AC 230V socket**

**Smart RF Box**

**WiFi**

### Remote control

If you want to control your devices even outside the house, contact your IT administrator.

Range of control is given by power (coverage) of your Wifi network.

## KIT OPTIONS

You can extend your kit by the following wireless units. Complete list of units found at **www.inels.com/kits**

Code: **6703**

### iNELS Cam
With the camera, you can watch the places where you can not be at the moment, or to enhance safety where needed. The application allows you to watch video from up to 10 cameras.

Code: **6307**

### Wireless thermovalve - RFATV-1
It measures the room temperature and sends it to the Smart RF box, that compares the temperature records with the set temperature and according to set program it sends a command to open or close the radiator valve.

Code: **4560**

### Switching socket - RFSC-61
Quick solution for wireless control of plug-in appliances, when the switching socket is installed between the existing socket and a plug-in appliance.

## iNELS HOME CONTROL APP (iHC)

Apps for your Smartphone (Android/iOS) allow you to control all wireless units – even from more Smartphones simultaneously.

- You can include units into rooms and create so-called "Scenes" when with just one touch of a button e.g. all lights will be turned off or each light will be set to a different color.
